While some of the stories actually are about cars found in barns or sheds, author Wyss has taken the liberty of expanding the definition of "barn find" to include any collector car found derelict, ignored, in pieces, or generally found in circumstances belying its stature. This could include cars parked in fields, found

in cellars, left in parking garages, or even found under a pile of cars in a junkyard. What the cars do have in common is that they are valuable and exotic and have histories chock full of unimaginable twists and turns. Take, for instance the Two Rotor Corvette, a car that cost GM \$2 million to build and then they flat gave it away to the first guy that asked. Same thing for a GT40 roadster, one of four built, and Ford goes and hands the keys to a movie car customizer who kept it for decades and never quite got it up on the big screen. That car today is worth \$4 million. So, if you're into collector cars and love the thrill of the hunt, then you'll truly appreciate the 50 stories Wyss has selected for this first in the series.

A legend in the car industry reveals the philosophy that's starting to turn General Motors around. In 2001, General Motors

hired Bob Lutz out of retirement with a mandate to save the company by making great cars again. He launched a war against penny pinching, office politics, turf wars, and risk avoidance. After declaring bankruptcy during the recession of 2008, GM is back on track thanks to its embrace of Lutz's philosophy. When Lutz got into the auto business in the early sixties, CEOs knew that if you captured the public's imagination with great cars, the money would follow. The car guys held sway, and GM dominated with bold, creative leadership and iconic brands like Cadillac, Buick, Pontiac, Oldsmobile, GMC, and Chevrolet. But then GM's leadership began to put their faith in analysis, determined to eliminate the "waste" and "personality worship" of the bygone creative leaders. Management got too smart for its own good. With the bean counters firmly in charge, carmakers (and

much of American industry) lost their single-minded focus on product excellence. Decline followed. Lutz's commonsense lessons (with a generous helping of fascinating anecdotes) will inspire readers at any company facing the bean counter analysis-paralysis menace.
