

2m 70cm Dual Band High Performance Gain Base Station Antenna

Recognizing the pretentiousness ways to acquire this ebook **2m 70cm dual band high performance gain base station antenna** is additionally useful. You have remained in right site to begin getting this info. acquire the 2m 70cm dual band high performance gain base station antenna link that we come up with the money for here and check out the link.

You could purchase guide 2m 70cm dual band high performance gain base station antenna or acquire it as soon as feasible. You could quickly download this 2m 70cm dual band high performance gain base station antenna after getting deal. So, considering you require the book swiftly, you can straight acquire it. It's correspondingly no question simple and suitably fats, isn't it? You have to favor to in this tune

In terms of signals, the Comet Original GP-3 Dual-Band 146/446 MHz supports two bands of UHF and VHF. Specifically, the exact spectrums are 144-148 Mhz for 2M and 440-450 Mhz for 440 UHF, respectively. Without alteration, the VSWR on 2M is 1.2, and that on 70cm is 1.35. These figures mean that the Comet GP3 is powerful.

Top 4 Best HF Vertical Antennas For Dual Band Purposes

Liner Phase Shifter technology permits the antenna to achieve high performance, high power rating low vswr, and broader band coverage on both 2m and 70cm bands. 2. Direct element joint structure with two interconnected FRP outer-shells. Enables the antenna to maintain the same strength as one with one piece structure.
