Christopher J. Foot This book has two types of material; both well done. The first could have been written decades ago, and is the "traditional" atomic physics.

Where you start with the hydrogen atom, and investigate its spectroscopy with the Schrodinger equation.

Having begun his physics career with a first-class honours degree and doctorate from the University of Oxford, Professor Christopher Foot spent several years working at Stanford University, supported in part by a Lindemann Trust Fellowship. He returned to the Oxford Physics Department and started research on laser cooling and trapping of atoms. Since 1991 he has been a tutorial fellow at St. Peter's College, Oxford.
