"We did not set out to write this book to change the way finance is taught, but rather to parallel and support the way that instructors from across the country currently teach finance. Well over 600 instructors teaching this course have shared their class experiences and ideas via a variety of research methods that we used to develop the framework for this text. We are excited to have authored a book that we think you will find fits your classroom style perfectly"--

Financial Markets and Institutions, 5e offers a unique analysis of the risks faced by investors and savers interacting through financial institutions and financial markets, as well as strategies that can be adopted for controlling and managing risks. In *The Mindful Musician: Mental Skills for Peak Performance*, author Vanessa Cornett offers guidelines to help musicians cultivate artistic

vision, objectivity, freedom, quiet awareness, and self-compassion, both on- and offstage in order to become more resilient performers. Contrary to modern culture's embrace of busyness and divided attention, Cornett's contemplative techniques provide greater space for artistic self-expression and satisfaction. With the aid of a companion website that includes audio files and downloadable templates, *The Mindful Musician* provides a method to promote attentional focus, self-assessment, emotional awareness, and creativity. The first of its kind to combine mindfulness practices with research in cognitive and sport psychology, this book helps musicians explore the roots of anxiety and other challenges related to performance, all through the deliberate focus of awareness.

M: Finance was developed for the undergraduate corporate finance course and designed with today's student in mind. With years of teaching experience as well market development, the author team developed a text to reflect that this critical course covers so many crucial topics and that instructors need to focus on core ideas to ensure that students are getting the preparation they need for future classes—and for their lives beyond college. The framework for *M: Finance* emphasizes three themes: (1) Finance is about connecting core concepts, (2) Finance can be taught using a personal perspective, and (3) Finance focuses on solving problems and decision making. The text also features concise chapters that lead students to crucial material by emphasizing core concepts, key research, and current topics. Personal examples in the text explain the concepts' relevance to students' lives, increasing their motivation to learn more. Because finance focuses on problem-solving and decision making, this text includes numerous exercises that target various learning styles.

"The last 30 years have been dramatic for the financial services industry. In the 1990s and 2000s, boundaries between the traditional industry sectors, such as commercial banking and investment banking, broke down and competition became increasingly global in nature. Many forces contributed to this breakdown in interindustry and intercountry barriers, including financial innovation, technology, taxation, and regulation. Then in 2008–2009, the financial services industry experienced the worst financial crisis since the Great Depression. Even into the mid-2010s, the U.S. and world economies have not recovered from this crisis. It is in this context that this book is written. As the economic and competitive environments change, attention to profit and, more than ever, risk become increasingly important. This book offers a unique analysis of the risks faced by investors and savers interacting through both financial institutions and financial markets, as well as strategies that can be adopted for controlling and better managing these risks. Special emphasis is also put on new areas of operations in financial markets and institutions such as asset securitization, off-balance-sheet activities, and
