Dialogue mapping has the same intention as facilitation: to help the group members hold an effective conversation on a complex topic. By [effective] we mean a conversation that both accomplished the objectives and built higher levels of shared understanding, respect, alignment, and transparency.

[Dialogue Mapping - CogNexus](#)

Dialogue mapping is a technique for diagramming meeting discussions. The three key elements are a facilitator who does the mapping, a shared display visible to all participants (preferably a screen and bright computer projector), and a simple graphical "language", called IBIS (Issue Based Information System), for representing the discussion.

[Dialogue Mapping | picture it solved](#)

Dialogue Mapping encourages collective thinking and therefore synergy between the participants. Because of this added value, Dialogue Mapping differs from traditional facilitation during meetings. It promotes mutual understanding and respect for each other and each other's opinions.

[Dialogue Mapping, a communication skills tool | toolshero](#)

This shared understanding is the objective that the dialog mapping process addresses, and that the software supports. The idea is to capture the questions with which the group is occupied, possible answers to those questions, and arguments for and against them in a visual display in a way that gives all participants a sense that their concerns have been heard and understood.

[Dialogue Mapping | Guide books](#)

Dialogue mapping Issue mapping is the basis of a meeting facilitation technique called dialogue mapping. In dialogue mapping, a person called a facilitator uses IBIS notation to record a group conversation, while it is happening, on a "shared display" (usually a video projector).
