Ford Bronco Ford Bronco was a sport utility vehicle manufactured by Ford between 1966 and 1996. This two-door SUV was reasonably popular, and sold well until it was discontinued. It was a competitor to the Jeep CJ-5 and Harvester Scout. Initially it had its own special platform but in 1970 it was made bigger and shifted to a F Series platform.

The Ford Bronco is a sport utility vehicle that was produced from 1966 to 1996, with five distinct generations. The Bronco permanently entered American popular culture on June 17, 1994, when a white 1992 model owned and driven by Al Cowlings with O. J. Simpson, who was wanted for the murders of his ex-wife and her friend, attempted to elude the Los Angeles Police Department in a low-speed chase, which was nationally televised and viewed by millions nationwide. This is complete story from conception through discontinuation in 1996, told by historian (and well-known "Ford guy") Paul McLaughlin utilizing his large collection of photographs, brochures, ads and other promotional material. Follow the Bronco's various incarnations from a small sport utility vehicle

of the 1960s and 1970s into the larger full-size Bronco of the 1980s and 1990s, special models like the "Bill Stroppe Edition", "Eddie Bauer Specials", the Bronco II and other juicy tidbits like the Bronco concept vehicle that Ford took on the car show circuit in 2005 (which got Bronco enthusiasts so excited that Ford was going to add a Bronco vehicle to their lineup once again). Also covered are the Broncos that were raced in off-road desert racing, Bronco toys and other collectibles, specification sheets, production numbers, and other interesting facts. Finally, a book for all Bronco enthusiasts!

The Ford FE (Ford Edsel) engine is one of the most popular engines Ford ever produced, and it powered most Ford and Mercury cars and trucks from the late 1950s to the mid-1970s. For many of the later years, FE engines were used primarily in truck applications. However, the FE engine is experiencing a renaissance; it is now popular in high-performance street, strip, muscle cars, and even high-performance trucks. While high-performance build-up principles and techniques are discussed for all engines, author Barry Rabotnick focuses on the max-performance build-up for the most popular engines: the 390 and 428. With the high-performance revival for FE engines, a variety of builds are being performed from stock blocks with mild head and cam work to complete aftermarket engines with aluminum blocks, high-flow heads, and aggressive

roller cams. How to Build Max-Performance Ford FE Engines shows you how to select the ideal pistons, connecting rods, and crankshafts to achieve horsepower requirements for all applications. The chapter on blocks discusses the strengths and weaknesses of each particular block considered. The book also examines head, valve train, and cam options that are best suited for individual performance goals. Also covered are the best-flowing heads, rocker-arm options, lifters, and pushrods. In addition, this volume covers port sizing, cam lift, and the best rocker-arm geometry. The FE engines are an excellent platform for stroking, and this book provides an insightful, easy-to-follow approach for selecting the right crank, connecting rods, pistons, and making the necessary block modifications. This is the book that Ford FE fans have been looking for.
