Usually the brake light switch on the pedal is broken off or the wire has become crossed as if you are always applying pressure to the pedal. ALSO, this can be a symptom of a master cylinder starting to fail or the power brake booster is stuck. If the pedal feels totally normal, then the brake pedal switch is likely. DR Mrs Bears face

This book addresses the emerging needs of the aerospace industry by discussing recent developments and future trends of aeronautic materials. It is aimed at advancing existing materials and fostering the ability to develop novel materials with less weight, increased mechanical properties, more functionality, diverse manufacturing methods, and recyclability. The development of novel materials and multifunctional materials has helped to increase efficiency and safety, reduce costs, and decrease the environmental foot print of the aeronautical industry. In this book, integral metallic structures designed by disruptive concepts, including topology optimization and additive manufacturing, are highlighted.
