Winner of the Nobel Prize in Economics Get ready to change the way you think about economics. Nobel laureate Richard H. Thaler has spent his career studying the radical notion that the central agents in the economy are humans—predictable, error-prone individuals. *Misbehaving* is his arresting, frequently hilarious account of the struggle to bring an academic discipline back down to earth—and change the way we think about economics, ourselves, and our world. Traditional economics assumes rational actors. Early in his research, Thaler realized these Spock-like automatons were nothing like real people. Whether buying a clock radio, selling basketball tickets, or applying for a mortgage, we all succumb to biases and make decisions that deviate from the standards of rationality assumed by economists. In other words, we misbehave. More importantly, our misbehavior has serious consequences. Dismissed at first by economists as an amusing sideshow, the study of human miscalculations and their effects on markets now drives efforts to make better decisions in our lives, our businesses, and our governments. Coupling recent discoveries in human psychology with a practical understanding of incentives and market behavior, Thaler enlightens readers about how to make smarter decisions in an increasingly mystifying world. He reveals how behavioral economic analysis opens up new ways to look at everything from household finance to assigning faculty offices in a new building, to TV game shows, the NFL draft, and businesses like Uber. Laced with antic stories of Thaler's spirited battles with the bastions of traditional economic thinking, *Misbehaving* is a singular look into profound human foibles. When economics meets psychology, the implications for individuals, managers, and policy makers are both profound and entertaining. Shortlisted for the Financial Times & McKinsey Business Book of the Year Award

In *Schools with Spirit*, twelve respected educators show how they welcome the sacred into their own work with students, in spite of their fears of "overstepping" and in the face of the complex obstacles to nurturing the inner life of children in a school setting. Since the mid-1990s, when Daniel Goleman established that nurturing a young person's "emotional intelligence" enhances his or her ability to learn, schools have been struggling with ways to attend to students' emotional and social -- as well as intellectual -- development. Yet too many recent books and programs tout the "character education" of children as a cure for incivility and worse, and too many of these are barely disguised tracts with religious or culturally noninclusive agendas.

In its pursuit to bring about an awakening among students of nursing about human social behavior, this second edition of *Sociology for Nurses* continues to build on sociological theories that are of relevance to the nursing community. Conforming to the syllabus prescribed by the Indian Nursing Council and catering to the needs of second year B. Sc Nursing students, this book provides jargon-free explanation of even the most difficult concepts to the student's benefit.

There is magic and mystery in the farmhouse known as Pistoulet, nestled in the remote, untraveled southwestern French countryside. Originally published in 1996, this 15th anniversary edition of *The Secrets of Pistoulet* tells the gentle tale of the healing power of magical soups and foods, while celebrating the redemptive and sustaining nature of shared meals among friends and family. With fold-out letters, removable recipe cards and pockets, and special vellum pages, *The Secrets of Pistoulet* quickly became a bestselling gift book. There's no better time to rediscover its magic.
