Birds of India book review | Birds of Indian subcontinent book review | Indian birds book review Evolution: It's a Thing - Crash Course Biology #20 **Modern Biology Study Guide Birds**

After the extinction of Enantiornithes, modern birds became the dominant bird, with a large radiation occurring during the Cenozoic Era. Referred to as Neornithes ("new birds"), modern birds are now classified into two groups, the Paleognathae ("old jaw") or ratites, a group of flightless birds including ostriches, emus, rheas, and kiwis, and the Neognathae ("new jaw"), which includes all other birds.

The study of imprinting behaviour in ducks and geese by Konrad Lorenz and the studies of instinct in herring gulls by Nicolaas Tinbergen led to the establishment of the field of ethology. The study of learning became an area of interest and the study of bird songs has been a model for studies in neuroethology. The study of hormones and physiology in the control of behaviour has also been aided by bird models.
