Another thing about National Geographic Magazine are the maps. They are usually map inserts, but in the recent years they also printed removable fold-out posters or maps. Not every issue has them, but many have been become famous, like the ones used by the Allies in World War II. The most valuable National Geographic maps are hard to pinpoint. Since they are so versatile in nature, it would be best to offer them or acquire them based on their type.

An aficionado of photography or someone with an interest in National Geographic Magazine would probably question the decision to publish a book with many iconic photos in such a small format. If price was a constraint, a soft-back could have been used and that would permit a proportionately larger format whilst maintaining the cover price.

Through the Len is a conuopia of National geographic's best photographs created since 1890 when the Society first started commissioning photographers to go out into the world and bring images back to its readership. Many of the 250 photographs have been previously published in the magazine but a great number of them are images that did not make the final edit but have great merit on their own.

Photographs from the archives of "National Geographic" share an array of work reflecting the themes of the land, underwater, science, the United States, and the world--by some of the world's finest photographers.

A lavishly illustrated volume, arranged by color in a rainbow of beauty, presents short, inspiring essays that explore the qualities, meaning and symbolism of each color, giving readers a new way to look at color in the world around them.

Includes photographs by Annie Griffiths and other National Geographic photographers.

Collects photographs from around the world involving the different ways people work.

For more than 100 years, National Geographic has set the standard for photographic excellence. Celebrating that tradition, this volume collects our most remarkable images in a single extraordinary book that visits every region of the world and even outer space. Some of these photos are world renowned while others have rarely been seen. Some illuminate distant cultures; others reveal the mysteries of nature. Whether you linger over an early pioneering shot or a more recent achievement, you'll find in each photograph a stunning testament to the power that pictures possess to go where words cannot.

Collects the work of National Geographic's best photographers, featuring striking images of places, events, natural phenomena, and manmade heirlooms seldom seen by human eyes, including ancient cave art and volcanic lightning.

Presents a collection of 260 photographs that offers panoramic views of scenes from every region of the world.

Presents a selection of full-color photographs from across Africa, covering topics including sense of place, the joy of being, inner journeys, patterns of beauty, rhythm from within, and capacity to endure.

Visions of Earth raises a curtain on the wonders of the world and thrills us with nature's opulence and humanity's splendor. Each image alone exposes a nugget of our planet's magnificence; the totality of the collection goes beyond our imagination. Turning the pages, viewers are struck by the richness of life on Earth. One photograph is more awe-inspiring than the next--chosen by veteran National Geographic Magazine photo editors to present what is visually incredible. The photographs are drawn from the popular "Visions of Earth" feature in the magazine, (rated #1 by readers), from our own storied Image Collection, and from renowned photographers throughout the world, many never-before published. Enthralling images fill the book in a gallery of stunning landscapes, fascinating people, amazing animals, and unexpected glimpses of the usual and unusual. Puffins' beaks signal breeding time in Norway and a speckled emperor moth in South Africa diverts predators with an illusion. An elephant takes a morning dip in India's Andaman Sea while Siamese crocodiles race in Thailand and surfers in Australia relish a perfect day. Monks in Bhutan run to dinner and a little girl in red stands out among white-robed women in an Indonesian mosque. Spanish youth decked in colorful, oversize papier-mâché heads celebrate a festival in Catalonia and a flower of flame blooms from a man's kerosene-filled mouth in a Sikh celebration in India. Around the globe, amazing moments are captured in time, from a spray of flash frozen-petal fragments in California to a truck show of chrome-covered and gleaming neon rigs half the world away in Japan. Visions of Earth is a welcome escape from the news of natural disasters, conflict, political upheaval, and social unrest that fills our lives. The book delights our senses, ignites our emotions, and renews our optimism, showcasing the many ways that our world is a marvel to behold and a privilege to call home.

Photographs from the archives of National Geographic offer more than four hundred and fifty images from virtually every corner of the globe of both wildlife and human achievements in exploration, adventure, culture, and science.
