Ocean Circulation - Open University, Open University Staff ...

The book represents all the knowledge we currently have on ocean circulation. It presents an up-to-date summary of the state of the science relating to the role of the oceans in the physical climate system. The book is structured to guide the reader through the wide range of world ocean circulation experiment (WOCE) science in a consistent way.

Ocean Circulation and Climate, Volume 103 - 2nd Edition
Publisher Summary. This chapter reveals that circulation in both the oceans and the atmosphere is driven by energy from the sun and modified by the earth's rotation. The radiation balance of the earth-ocean-atmosphere system is positive at low latitudes and negative at high latitudes. Heat is redistributed from low to high latitudes by means of wind systems in the atmosphere and current systems in the ocean.
