Orthopedic Assessment in Massage Therapy: Lowe, Whitney ::

Assessment may include verbal consultation, range of motion testing, manual resistance and other special testing, and may be done before your therapist starts your massage, or as part of your massage treatment. Assessment allows your therapist to track changes in your symptoms, so they can adjust their treatment plan as you heal. An assessment allows for a specialized and targeted treatment; this does more than just soothe your symptoms and allows for lasting results, including decreased ...

Massage Therapy Assessment

An orthopedic massage may help relieve tight muscles. The first step in an orthopedic massage session is assessment, in which the therapist will talk to the client about the problem and examine the area of interest. If the massage therapist partners with a physician, he or she will also look over notes from the physician.

1. client will stand or sit with arms flexed at 90 degrees at the elbow and abducted to 90 degrees (pain might be in the 4th and 5th digits)and will hold for 30 secs. 2. client will then bring hands up and behind his head. a positive sign will be pain in the scapular region.

Orthopedic Assessments—Massage Therapy | StudyHippo.com

Soft tissue rehabilitation is a mainstay of massage therapy in orthopedic settings. By Maureen Salamon, November 6, 2018. With more than 300 individual joints in the human body, pain and dysfunction in the tissues and muscles surrounding those joints is a common problem. But whether due to injuries, overuse or other types of trauma, soft tissue rehabilitation is a mainstay of massage therapy in orthopedic settings and a place for massage therapists to shine.
