We have a passion for paint. We're experts in the proud craft of making paints and coatings, setting the standard in colour and protection since 1792. Our world class portfolio of brands - including Dulux, International, Sikkens and Interpon - is trusted by customers around the globe. We are active in over 150 countries and employ around 34,500 talented people who are

Based on investigations across Europe and North America, this report addresses the key areas of interest to architects, engineers, manufacturers, installers and building owners. Recommendations are given on the specification of appropriate materials (including insurance and guarantee arrangements), design guidance, installation and maintenance and on the need for training of installers. Areas requiring further research and standardisation are also identified.

Particle boards, Fibre building board, Woodbased sheet materials, Wood products, Tensile testing, Test equipment, Test specimens, Specimen preparation, Testing conditions

Uses practical and research-based approaches to improve students' higher-order thinking skills and includes strategies for differentiating higher-order thinking skills and developing them in English language learners.

An overview of critical conceptual approaches to water justice, illustrated with global historic and contemporary case studies of socio-environmental struggles.

Tourism is an activity that anyone can take part in, regardless of their age, gender, nationality or level of income. This makes tourism one of the most rapidly developing industries in the world. Despite the number of benefits which tourism produces, it also has significant negative impacts on the environment. To minimise the scope of these negative impacts, joint efforts combining tourism and environmental management are called for. This book examines the application of the Life Cycle Assessment (LCA) method and lifecycle thinking as a tool to generate more accurate and holistic appraisals of the environmental impacts of tourism. Looking at the issue of sustainability of tourism operations, the book evaluates how it can be improved. It highlights the potential of LCA to affect tourist behaviour and contribute to tourism policy-making and managerial practice. This book provides a valuable resource for undergraduates, postgraduates and researchers interested in sustainable tourism, sustainable development and environmental impact assessment.
