Transcription Study Guide. This study guide is a written version of the material you have seen presented in the transcription unit. The cell's DNA contains the instructions for carrying out the work of the cell. These instructions are used by the cell's protein-making machinery to create proteins. If the cell's DNA were directly read by the protein-making machinery, however, it could be damaged and the process would be slow and cumbersome.

~~Transcription Study Guide - University of Washington~~

A large transcription complex, including RNA polymerase and other proteins, assembles at the start of a gene and begins to unwind the DNA. Using one strand of the DNA as a template, RNA polymerase strings together a complementary strand of RNA. The RNA strand detaches from the DNA as it is transcribed, and the DNA zips back together.
