The Bio-Integrated Farm: A Revolutionary
System Using Greenhouses

Permaculture-Based
System Using Greenhouses
Ponds, Compost Piles,
Aquaponics, Chickens, and More by Shawn
Jadrnicek and Stephanie Jadrnicek takes the
farm or backyard pond beyond beyond a
simple water garden or rainwater storage to
turn it into a multi-function element of your
homestead. With a detailed discussion of
construction and usage, Shawn opens up a
wealth of opportunities to increase food and
energy production using the power of water.

Farming according to the UNI 11233-2009 European standard as a farming system where high quality organic food, feed, fibre and renewable energy are produced by using resources such as soil, water, air and nature as well as regulating factors to farm sustainably and with as little polluting inputs as possible.

Integrated farming - Wikipedia

A bio-integrated greenhouse, for example, doesn't just extend the season for growing vegetables; it also serves as a rainwater collector, a pond site, an aquaponics system and a heat generator. The Jadrniceks noticed that designs take on a new life of their own once the magical number of seven functions is reached.
