The Industrial Revolution was an epoch during the first 100 years of United States history where the economy progressed from manual labor and farm labor to a greater degree of industrialization based on labor. There were many improvements in technological and manufacturing fundamentals with the result that this shift greatly improved overall production and economic growth in the United States. The Industrial Revolution occurred in two distinct phases, the First Industrial Revolution occurred dur

[Industrial Revolution in the United States](#)—Wikipedia

The industrial revolution caused rapid urbanization in America, with people moving from the countryside to the cities in droves. In 1800, only 6 percent of the population of America lived in cities but by 1900, that number had increased to 40 percent. By 1920, the vast majority of Americans lived in cities.
