An Introduction to the Theory of Constraints

The Theory of Constraints is a management approach that considers that at any given time, an organization is limited from achieving its highest goal by a single constraint. The theory provides

tools to help identify and break through the constraint. Industry experts help create a richer picture of what TOC offers:

idea that the main limiter on the speed of a system is the weakest element, with other issues having relatively smaller effect. The method is then to tackle this weakest element to improve it as much as possible. It was first introduced by Eliyahu Goldratt in 1984. Constraint is the weakest link in the chain.
